

L-372 Soak Tank Cleaner

L-372 is a heavy duty cleaning formulation for use on steel, aluminum and zinc, metal parts in soak tank cleaning applications. Combines potent wetting and dispersing agents with a highly refined alkaline build to penetrate and remove most petroleum based oils, lubricants, and coolants. It also removes a wide variety of synthetic oils and coolants. It is specifically formulated to work in a wider range of solution concentrations, giving the operator more flexibility in determining when to make adds to the tank.

USAGE & DILUTION RECOMMENDATIONS

Use 2 to 8 ounces per gallon of water. Maintain solution operating temperatures between 120° and 135° F. Maintaining concentration levels and solution temperatures as recommended is crucial for attaining optimum cleaning results and low foaming characteristics.

PHYSICAL PROPERTIES

Appearance	Red Liquid
Specific Gravity	1.15
pH @ 1 % Solution	10.5
Solubility in Water	Excellent
Odor	Mild
Flash Point	None
Stability	Stable
Foaming Action	Moderate
Metal Safety	Steel, Aluminum & Zinc

HANDLING & STORAGE

This is a non-combustible alkaline liquid. Use good industrial hygiene practices such as wearing chemical safety goggles, rubber gloves, impermeable apron, and rubber boots as necessary to avoid personal contact with this product. In case of contact, flush eyes and/or skin with plenty of water for at least 15 minutes. Consult physician and remove contaminated clothing promptly. Store product in tightly closed containers between 50° and 85° F. Rotate stock. When stored as stated above, shelf life is a minimum of 2 years.

Progress Chemical guarantees its products will perform to your satisfaction when used in accordance to our recommendations. We back this guarantee with over 50 years experience. Our company has been certified to ISO 9001 :2000 Quality Standards.

Refer to our Material Safety Data Sheet for additional information.
